Professional Summary

Multidisciplinary engineer and UC Berkeley Master of Development Engineering specializing in AI & Data Analytics for Social Impact. Experience across development consulting, policy research, and nonprofit finance, combining data-driven analysis, systems thinking, and stakeholder engagement to strengthen purpose-driven organizations and to inform strategic decisions. Guided by empathy, pluralism, and a commitment to human dignity. Seeking high-impact opportunities at the intersection of technology, international development, and philanthropy to support sustainable economic opportunity.

Education

2025 - 2026
UC Berkeley **Berkeley, California**
Master of Development Engineering *(Concentration in AI & Data Analytics for Social Impact)*
Graduate Student Instructor:
- **Resilient Cities by Design (Spring 2026),** ***Civil Engineering and Department of City and Regional Planning***
- **Perspectives for Sustainable Rural Development (Fall 2026),** ***Global Studies***

2017 - 2022
Universidad de los Andes **Bogotá, Colombia**
Industrial Engineer (*Emphasis on Organizational Management, Operations Research and Statistics)*
Biomedical Engineer (*Emphasis on Design & Innovation in Biomedical Engineering)*

Professional Experience

June 2026 – August 2026 **Oakland, California**
The Greenlining Institute
Climate Finance Summer Consultant
- Conducted policy research on California's COIN program, which mobilizes insurer capital toward investment opportunities that produce environmental and social benefits in low-income and rural communities. Built an 82,000+ investment dataset (1997–2020) through web scraping and validation workflows.
- Combined quantitative and qualitative methods (data analysis, interviews, case studies) to inform COIN+ policy recommendations on data transparency, geographic targeting, insurer participation, and community impact.

February 2024 – August 2025 **Chicago, Illinois**
Association House of Chicago
Financial Analyst (Remote)
- Redesigned budgeting across 20 social programs and 60 grants, improving coordination and resource planning through a collaborative five-iteration process completed in under 6 weeks.
- Delivered monthly financial analysis and insightful visualizations for the Finance Committee, facilitating strategic decision-making on trend identification, deficit mitigation, and surplus optimization for resource allocation.
- Monitored financial performance across $4M+ in annual grant funding, analyzing revenue, expenses, payroll, and account activity. Built an e-form/Salesforce workflow to streamline staff reporting and track fund utilization for grant compliance.

December 2022 - August 2025 **New York City**
NY Sun Works
Performance Consultant – BI & Data Analyst (Remote)
- Independently learned AWS QuickSight and built semi-automated BI dashboards integrating organizational data to enable continuous data-driven decision making and operational efficiency.
- Integrated Accelo CRM and QuickBooks data to monitor program implementation (weekly, monthly, and annual performance reports) and measure performance against organizational targets using metrics and benchmarks.
- Trained staff to use and maintain interactive dashboards, supporting adoption of new digital workflows across teams and enabling weekly BI workflows to be completed in approximately one hour.

August 2022 – February 2024
Oportunidad Estratégica **Bogotá, Colombia**
Project Consultant
Advised public, private, nonprofit, and international organizations on institutional strengthening, public policy, and

strategic planning across bioeconomy, energy, government regulation, higher education, and economic development.

- Financial chapter of "*Electric Power in Colombia's Caribbean Coast: Between Poverty and Gaps in Service Provision*"- 2024: Analyzed interviews, sustainability reports, and financial statements from electricity providers to assess how tariff and subsidy structures affect utility sustainability and **energy access** on Colombia's Caribbean coast.
- Foresight advisory for Colombia's Ministry of Science, Technology and Innovation in developing a mission-oriented innovation policy for the Bioeconomy and Territory mission of the government - 2023: Combined strategic foresight methodologies with novel techniques for scientific and technological surveillance (mapping research institutions and patents) to assess the existing capacity of **Colombia's Bioeconomy** and inform strategic innovation roadmaps.
- Strategic Planning for Comfacundi - 2023: Facilitated participatory strategic planning for a **social security** entity through executive board interviews and workshops. Translated findings into strategic priorities and deployment matrixes.
- Study to restructure Colombia's National Institute for Drug and Food Surveillance (INVIMA) - 2023: Synthesized focus groups with private-sector stakeholders (National Association of Industrialists), institutional interviews, and international regulatory benchmarking to diagnose structural challenges and develop recommendations to **restructure the health regulatory agency**. Outlined and drafted a first comprehensive report.
- Strategic Planning for the World Chambers Federation (ICC - WCF) - 2022: Engaged **international stakeholders** across ICC WCF through interviews with leadership, internal workshops, and surveys of members (chambers worldwide) to identify issues, opportunities, and develop implementation guidelines and strategic tools for its global network.
- ASCUN's (Colombian Association of Universities) "Financial Sustainability of Higher Education" study - 2022: Structured and edited the final publication of a **financial sustainability of higher education** study synthesizing key insights on successful university case studies and recommending strategies for other institutions.
- Developed **multi-sector consulting proposals** and the 2022 Annual Report supporting the firm's business development.

January 2020 - June 2022
Universidad de los Andes **Bogotá, Colombia**
Undergraduate Teaching Assistant
Supported 200+ students across courses in argumentative writing, discrete-event simulation, experimental design, and self-reflective learning, developing strong written and oral communication, pedagogical design, and structured-feedback skills.

- **Public Systems** (2021–2022), Industrial Engineering
- **Discrete Event Simulation** (2021–2022), Industrial Engineering
- **Design of Experiments and Biostatistics** (2020), Biomedical Engineering
- **Peace Builders** (2020), Faculty of Education

June 2018 – May 2022
Off Bound Adventures / ZAMBO **Bogotá, Colombia**
Experiential Educator and Staff Counselor
Planned and delivered experiential education programs for 100+ students across Colombia, designing pedagogical activities with local communities and coordinating multidisciplinary teams on logistics and risk mitigation protocols.

Skills

- **Data and technology:** Web Scraping, Data Integration & Analysis**,** Network Science, Machine Learning, BI & Data Visualization, Front-End Development, AI for good applications
- **Research & Policy:** Quantitative Analysis, Qualitative Research (Interviews, Focus Groups & Workshop Facilitation), Policy Research, Strategic Foresight, Systems Thinking
- **Strategy & Organizations:** Strategic Planning, Financial Analysis and Executive Reporting, Grant Compliance, Resource Allocation, Performance Measurement, Workflow Design & Operational Efficiency, Project Coordination
- **Partnerships & Engagement:** Cross-Sector collaboration, Stakeholder Engagement, Capacity Building
- **Languages:** Spanish (native), English (Advanced, 95 TOEFL (2024) & 7.5 IELTS (2019)), French (Basic, B1 DELF).
- **Programs and software:** Python, *AWS* QuickSight, Salesforce, Accelo, QuickBooks, Microsoft 365 (Excel, PowerPoint), NetLogo, Simio, Vensim, Oracle Crystal Ball, Visual Basic, LaTeX

Volunteer Community Engagement

Progresa Fenicia (2022): Academic mentoring | *Proyecto Vida (2020):* Experiential learning and life-project development | *Soñar Despierto (2015-2017):* Personal development support for children in challenging environments.
